

Hello world T_EX!

October 2, 2025

A factorization $x^3 - 1 = (x - 1)(x^2 + x + 1)$. Indefinite integrals

$$\int \sin x \, dx = -\cos x, \quad \int \frac{1}{x} dx = \log |x|$$

A matirx

$$B = \begin{pmatrix} 1 & 0 & 0 \\ 1 & 1 & 0 \\ 1 & 1 & 1 \end{pmatrix} \tag{1}$$

You can quote an equation like (1). You can use a non standard symbol like const (if you write `$const$`, you will get *const*). You can use a **color**. You can make a list

	ε	α	β	γ
ε	ε	α	β	γ
α	α	ε	γ	β
β	β	γ	ε	α
γ	γ	β	α	ε

Table 1: Kline group

You can add a reference like [1].
